

INTELLIGENT LARGE-FLOW 4200ML

Hydrogen Generator with an Aluminum Shell

Engineered for performance. Designed for life.

The MEHA Hydrogen Generator delivers high-purity hydrogen through intelligent technology and premium craftsmanship. With a sleek aluminum shell, powerful output, and user-focused design, it's your partner in daily wellness and recovery.

Effortlessly Portable:

Equipped with an ergonomic handle for seamless lifting and relocation.

Smooth Mobility:

Four sturdy wheels facilitate easy maneuverability across various surfaces.

Global Compatibility:

Dual voltage capability (110V/220V) ensures seamless use across international borders.

Simple Refilling:

Simply add purified or distilled water to activate the generator.

Versatile Capacity:

Adjustable settings for 4200ML, 3150ML, or 2100ML to suit your specific needs.

Extended Operation:

Runs for up to 8 hours of continuous, reliable hydrogen generation.

User-Friendly Design:

Top-mounted hydrogen outlet for effortless access and operation.

Shared Experience:

Dual hydrogen outlets allow for simultaneous use by two individuals.

Drainage Control:

Precision drain valve regulates water drainage speed for optimal maintenance.

Three Adjustable

Flow Rates:

4200ml • 3150ml • 2100ml
